## Can I access DocBanq using a web browser?

Posted by Mario Boutet - 2008/03/31 12:05

---

Yes - the DocBanq client, the Remote is a lightweight ActiveX control that plugs into Microsoft Internet Explorer which gives remarkable performance and security. The Remote is also available as a standalone product for use with any browser.

MacOS and Linux client access is not supported at this time (however we do have a number of clients that use VPC for Mac).
